Teaching Aims and Contents	Business is an exciting process and accounting is the perfect window through which we see the effects of economics. Due to the fact that accounting aids the comprehension of economic events and is associated on simple principles, this class introduces concepts including the crucial basis of accounting that underlies the balance sheet, income statement and statement of cash flows.					
Course	Besides the class meeting, at least one-third of the class sessions focus on the exercises from the textbook presented. Students need to attend the classes to master the subject.					
Grading	Midterm exam(30%) Final exam (30%) Class participation(40%, includes tests in class and homeworks)
