科目簡介(可含大綱及教學進度)：						

The selections for this course cover themes and fascinating topics such as world issues, science, or health. To help the students develop reading skills and vocabulary base, a series of exercises are designed, providing them with level-appropriate exercises and activities in comprehension, building vocabulary, making inferences, finding the main idea, determining cause and effect, paraphrasing, and learning to work more effectively with two-word verbs, compound words, connecting words, and noun substitutes. Finally, each unit ends with a set of high-interest, interactive tasks to help students practice the new vocabulary and skills they have learned in more open-ended contexts.
