教學目標 與內容	<p>First semester :</p> <p>This course is intended to give students of the intermediate and advanced level a better understanding of both British and American culture from an historical perspective as well as geographical starting from the Indo-European invasion of Europe up to modern and contemporary Anglo-American societies. The importance of this course is to let students know and understand where the English language came from and why is it that important today. Who were its first settlers? Where do the Celts come from? Who were the Romans? What changes did they bring about into English society? Who were England's famous kings? Who were America's first settlers? Where did the Native-Americans come from? What were the American Revolution and the Civil War all about? Why did Europeans go to America? And finally, what are the main differences between British and American societies of today?"</p> <p>Second semester:</p> <p>Through various CDs and DVDs of rock musicians of the 60s and 70s- starting from the Beatles to the American band the Eagles, which ended in late 1979- the students will get to know what has happened in both England and the USA during those critical years commonly known as the 'hippie revolution.' Who was John Lennon? Bob Dylan? George Harrison? Jim Morrison? Why were so many 'hippies' influenced by them? Why did they want to change Anglo-American society as a whole?</p>
