教學目標與內容	<p>The course goals are to develop an understanding of the application of strategic cost management principles for business, and to provide an opportunity to develop skills in applying these principles through exercises and cases. The management accountant's role is to provide timely and accurate information to assist management in achieving the firm's goals. This is an integrative role, which requires the management accountant to understand the firm's strategy, and to understand how both financial and non-financial information is developed across all the management functions.</p> <p>There are four specific goals, each of which is covered in sequence in the four parts of the course:</p> <ol style="list-style-type: none"> 1. Understand the fundamentals of management accounting, including the strategic focus, and other basic cost terms and concepts 2. Determine product costs 3. Use costs and other critical success factors in management planning and decision making 4. Use costs and other critical success factors in operational control
