教學目標 與內容	This course is designed for intermediate beginning English as a Foreign Language student who spend times reading and writing. Those exercises and activities are available but they support the readings rather than overshadow them. This kind of thematic approach allows students to build on theme-related background knowledge, providing anchors for adding and relating additional vocabulary and content expectations. The goal of this course is to facilitate student-centered interaction, and there has been a careful attempt to balance new input for students with ample opportunities for conversation practice.
